

FIREWISE USA[®]
RESIDENTS REDUCING WILDFIRE RISKS

Time Investment & Expense Worksheet

Skip the paperwork!

Scan the QR code to the right & submit your Firewise investment hours digitally.

Name: _____ Date: _____

Community Name: _____

Email: _____ Phone #: _____

Please enter the number of person hours contributed to the following efforts:

Dwelling Unit/Home

Examples include: Removing pine needles and leaf litter from roof and gutters, replaced vinyl gutters with metal gutters, ignition-resistant exterior improvements, installing screening on vents, flammable items removed from under decks and porches, inspect roof and replace missing shingles, etc.

Landscaping (0–100 ft from base of dwelling unit)

Examples include: Installation of hardscaping, replacing combustible mulches with stone/gravel options, tree and shrub removal, raking and removal of pine needles, leaves, ground litter/debris, tree trimming/limbing, moving firewood, lawn and native grass maintenance, etc.

Common Area

(HOA or other Homeowner jointly owned property within the site boundary) Activities include: Tree thinning, mastication and brush removal, grass maintenance, fire break construction, etc.

Miscellaneous

Meetings, presentations, program administration, home site visits, outreach & education, etc.

Vegetational Removal

A major component of wildfire risk reduction is the removal of vegetation (shrubs, brush, limbs, trees, etc.) from individual properties and common-area property. Tracking vegetation removal provides forestry and fire agencies with information on the quantity of potential wildfire fuel that’s been eliminated from the area(s).

Please record the quantity of vegetation removed by entering how many bags, truckloads, or dumpsters of material was removed in your fuel reduction activities:

Lawn and leaf bags removed:

Average 0.2 cubic yards per bag

Pickup truck loads removed:

Average 3 cubic yards per load

Dump truck loads removed:

Average 12 cubic yards per load

Roll off dumpster/container removed:

Average 20 cubic yards per dumpster

Record Other Types of Vegetation Management (Optional)

Prescribed Burning

If you utilized prescribed burning, please describe the burn event (e.g. burn piles, field burning, Ag burns, underburning, etc.):

Recycled/Reused Vegetation

Was the vegetation reused or recycled? If so, please enter how you recycled it (e.g. wood chips, firewood, garden mulch, etc.):
